The First Name in Liquid Candle Lamps

In 1970, Hollowick pioneered the liquid candle concept in the foodservice industry. We make liquid paraffin wax fuel that is specifically formulated to be clean and safe.

Safety First

The Hollowick system is approved by all major fire departments for use in restaurants. Our lamp fuel is classified as not toxic and non-flammable. It is in the same non-flammable category as vegetable oil: NFPA Class IIIB combustible liquid. D.O.T. regulations rate it non-hazardous. It is safe to use on the tabletop and there are no shipping restrictions, storage limitations or insurance worries. Our lamps are not intended to be used with kerosene or most common lamp oils, which are not suitable for liquid candles and tabletop use.

Clean Candlelight without Candle Mess

We maintain refining capabilities to ensure the best liquid wax lamp fuel available. Our liquid system burns cleaner than solid wax candles. Non-staining. No melted wax mess.

Foodservice Equipment Standards

Hollowick lamps and fuel are specifically designed to meet the demanding needs of the foodservice tabletop. They require little maintenance and provide years of intimate table lighting. A reflection of your high quality standards.
